II. **Proposed Process Map**

(Evaluate each community under each Strategic Priority)

Example:

A. **Proposed Community #1: HIV/AIDS Consumers**

1. **Strategic Priority #1: Consumer Access to and Experience with Clinical Services**

Baseline: In Los Angeles County, HIV surveillance data showed that at the end of 2013, 28.9% or 13,395 persons living with HIV/AIDS had unmet medical need. The Health Resources and Services Administration (HRSA) defines people living with HIV/AIDS with unmet need as those who are aware of their HIV infection and who have not received any primary care within the last 12 months. It is believed that this group is demographically compromised of persons, especially women and children, of color; persons who are homeless; at-risk persons who remain uninsured after the ACA, persons who are recently released from incarceration, persons with substance abuse problems; and persons with mental health conditions.
